

QOSSAY MOJAHED DAWOUD KAMEL

Software Engineer | Flutter & Full-Stack Developer | AI Agents | Banking & Customer Experience

Bethlehem, Palestine | +970 566 567 661 | kamelqossay@gmail.com | Qossay Kamel — LinkedIn | QossayKamel22 — GitHub
English (Fluent) • Arabic (Native)

PROFESSIONAL SUMMARY

Flutter-focused Software Engineer with full-time production experience shipping mobile banking applications for multiple financial institutions at PCNC IT Solutions, a long-standing technology partner to Bank of Palestine. Complements this with full-stack web development (React, TypeScript, Firebase) and backend/AI Agent engineering (Python, FastAPI, PostgreSQL, LangGraph). Brings direct digital-banking and customer-facing experience from Arab Bank — digital sales, customer relations, and internet-banking adoption — giving equal fluency in engineering delivery and customer/business understanding. Currently building POS Agent, a LangGraph-based operations-monitoring system, and MIZAN, a Flutter/FastAPI personal finance platform.

TECHNICAL SKILLS

Mobile: Flutter • Dart • Firebase • REST APIs • State Management (Provider) • Cross-Platform iOS/Android

Web: React • TypeScript • JavaScript • Vite • Laravel • HTML • CSS

Backend: Python • FastAPI • Node.js • Express.js • Java • Spring Boot • SQLAlchemy • Alembic • Docker

Databases: PostgreSQL • Cloud Firestore • SQL

AI & Automation: LangGraph • AI Agents • LLM Tool-Calling Workflows • Agentic Workflows • Business Process Automation

UI/UX & Design: Figma • UI/UX • Wireframing • Prototyping • Branding

Business & Customer: Digital Sales • Digital Banking • CRM • Customer Needs Analysis • Requirements Gathering • Digital Product Adoption • Client Communication

PROFESSIONAL EXPERIENCE

Customer Relations Officer — Digital Sales & Digital Banking — Arab Bank

Feb 2025 – May 2026

- Worked in digital sales, customer relations, and internet banking — helping customers adopt and use Arab Bank's digital and internet banking products, including the Arabi Mobile app.
- Identified customer banking needs, explained digital banking products, and guided customers through onboarding to internet and mobile banking channels.
- Resolved customer issues and communicated banking workflows clearly, building requirements-gathering and stakeholder-communication skills applicable to technical sales and solutions consulting.
- Gained ground-level familiarity with how a bank's digital ecosystem — including its mobile app — is positioned and used by real customers, connecting the customer side of digital banking with the engineering side of banking apps seen at PCNC.

Flutter Developer — PCNC IT Solutions

Aug 2024 – Jan 2025

Full-time, first role following graduation — PCNC is a Palestinian technology company (est. 1997) and long-standing technology partner to Bank of Palestine

- Worked full-time as a Flutter/Dart developer, contributing to production-grade mobile banking applications across iOS and Android for Bank of Palestine, Cairo Amman Bank, Arab Islamic Bank, and Safa Bank.
- Built and maintained application features and screens, and integrated APIs with banking backend services within existing, production-oriented codebases.
- Implemented authentication and secure user flows, and translated business and banking requirements into working, reliable software.
- Performed debugging and maintenance on live production applications, collaborating closely with banking and technical teams to deliver stable releases.
- Wrote clean, maintainable, and scalable Dart/Flutter code following the team's established engineering practices.

Frontend & UI/UX Developer — Dimensions

Jul 2023 – Oct 2023

Internship, during 3rd year of university

- Designed wireframes and prototypes to improve software usability as part of a structured internship program.
- Collaborated with the frontend team to translate UI/UX designs into functional interface elements.

IT Officer — BJP Pharmaceutical Company

Jul 2022 – Oct 2022

- Managed IT support ticketing, hardware/software troubleshooting, and network maintenance.

UI/UX Designer & Branding Specialist — Freelance

2021 – Present

- Delivered branding assets, logo design, and UI/UX solutions in Figma for independent clients alongside university studies and other roles.

BUSINESS & CUSTOMER EXPERIENCE

- Customer Relations Officer — Arab Bank digital sales and customer adoption of internet/mobile banking products
- Customer Relationship Management — ongoing account support and issue resolution
- Customer Needs Analysis & Requirements Gathering — identifying what customers need before a solution is presented
- Digital Product Adoption & Onboarding — guiding customers to internet/mobile banking tools
- Client & Technical Communication — explaining banking/digital products in plain terms

- Business Process Understanding — banking workflows from both the customer side (Arab Bank) and the engineering side (PCNC)

SELECTED ENGINEERING PROJECTS

MIZAN — Smart Personal Finance Platform — Flutter · Firebase · Python · FastAPI · PostgreSQL · AI Agents · LangGraph

- Built a Flutter mobile application for personal finance management — income, expenses, budgets, savings, and financial goals — with an Arabic-first UI.
- Implemented a Python/FastAPI backend with PostgreSQL for structured financial data, and Firebase for authentication.
- Integrated LangGraph-based AI Agent workflows as the foundation for future AI-powered financial insights.

FLOW — AI-Powered CRM Platform — React · TypeScript · Vite · Firebase · React Router

- Built a full-stack CRM web application for managing leads, customers, deals, and follow-ups in one dark-first workspace, with every module reading/writing live data through Firebase — not mock content.
- Implemented full CRUD across leads, customers, deals, and follow-ups, including a drag-and-drop Kanban sales pipeline, lead scoring, and live analytics (win rate, revenue, pipeline-by-stage).
- Modeled a per-user Firestore data structure with security rules scoping all reads/writes to the authenticated owner; designed and built the product end-to-end (UI/UX, data architecture, security).

IronFit — Smart Fitness & Workout Platform — Flutter · Dart · Firebase · Provider · REST APIs

- Built a Flutter/Dart fitness management application connecting gym owners, coaches, and trainers, using Firebase for data and Provider for state management.
- Implemented trainer-facing features: customized training plans, workout routines with instructional videos, and progress tracking with coach feedback.
- Built gym-owner analytics covering member attendance, subscription status, and trainer/gym utilization via REST API integration.

NOVA — Personal Productivity Command Center — React · TypeScript · Vite · Firebase Authentication · Cloud Firestore · React Router

- Built a React/TypeScript web application (Vite) unifying tasks, goals, notes, calendar events, and productivity insights in one workspace.
- Implemented Firebase Authentication and Cloud Firestore for data persistence and CRUD functionality.
- Used React Router for protected routes and structured the frontend around reusable, responsive components.

POS Agent — Restaurant Operations Monitoring — Python · FastAPI · LangGraph · PostgreSQL · SQLAlchemy · Alembic · Flutter · Docker

- Building a restaurant operations monitoring system that reads live POS data and detects deviations from a branch's own operational baseline using a statistical (non-ML) detection layer.
- Implemented a LangGraph-based agent to manage the alert lifecycle, routing operational alerts to the responsible manager.
- Backend built with Python, FastAPI, PostgreSQL, SQLAlchemy, and Alembic migrations, containerized with Docker; Flutter client in active development.
- Documented 90+ architecture decisions with a full requirements/specification trail.

MAKAN — UAE Real Estate Intelligence Platform — React · TypeScript · Vite · Firebase · Python · LangGraph · PostgreSQL · In Development

- Designing a real-estate discovery and evaluation platform for the UAE market, helping users compare properties by lifestyle, location, budget, and investment goals.
- Architecting a React/TypeScript/Vite and Firebase frontend on top of a Python/LangGraph/PostgreSQL backend for property intelligence and recommendation logic, extending FLOW and POS Agent experience into UAE PropTech.

NASDAQ — Fashion & Accessories Mobile Commerce — Flutter · Dart · Provider · HTTP · Shared Preferences

- Built a Flutter mobile commerce application for fashion and accessories, using Provider for state management.
- Integrated HTTP-based API communication and local persistence via Shared Preferences.

iShop — C2C Marketplace App — Flutter

- Marketplace app allowing users to sell, trade, or barter new and used items, with delivery options, cash-on-delivery, and secure electronic payments.
- Implemented real-time dashboards for sellers/admins to support decision-making and improve operational efficiency.

iCar — Car Services Booking App — Flutter · Firebase · Figma

- Booking platform connecting car owners with service providers for maintenance and repairs, with smart scheduling, real-time notifications, pricing/reviews, and a points-based loyalty program.

Additional Academic & Freelance Projects — Flutter · React · Express.js · Spring

- Online Training / Education Application (Flutter) — application-side build for an online training platform, including UI, backend/API integration, authentication, and user flows.
- University Library Booking System (React · Express.js) — website for reserving library items, built as university coursework.
- Online Clothing Store (Spring · React) — e-commerce site built as 3rd-year coursework at Bethlehem University.

EDUCATION

Bachelor of Science in Software Engineering — Bethlehem University

2020 – 2024

GPA: 2.93 / 4.0

High School Diploma (IT Stream)

2018 – 2020

Score: 96.4%

Access English Language Scholarship — U.S. Consulate

2016 – 2018
